

# MULTIBOX-SYSTEM SOLUTION

# KNDS

## / Excellent Logistics: the key to success

Modern armed forces must be capable of great mobility and of surviving in deployments at all levels of intensity. In addition to the equipment, logistics plays a decisive role in ensuring readiness for action and long-term endurance.

Operational readiness is considered as a key indicator in logistics – so we support's the optimization of system logistics all along the supply chain. Our MOBILE SOLUTIONS provide the necessary support and makes logistics more effective and efficient – no matter where.

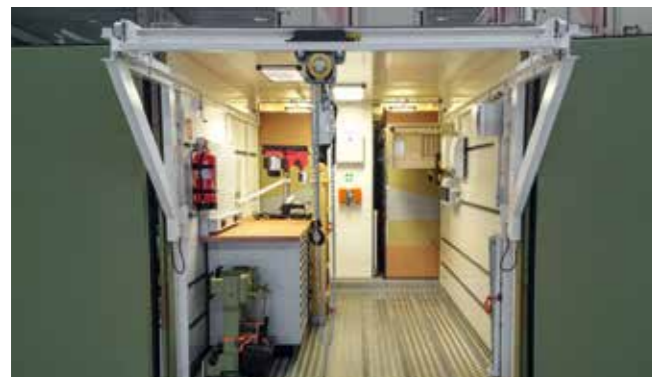

Through high user orientation and close collaboration, we offer specific service solutions all the way to the operating site. Our goal is your system availability! Together we will find the perfect solution to meet your demands.

## / MULTIBOX variants

### **MULTIBOX-Mobile Workshop**

The workshop for repairs in the operational area with everything on board: tools, consumables, small parts such as screws, and a suitable workplace.

### **MULTIBOX-Powerpack/Wheel**

The integrated skid system makes the engine and tires ready for use as quickly as possible. This MULTIBOX variant can be used for any kind of large spares.

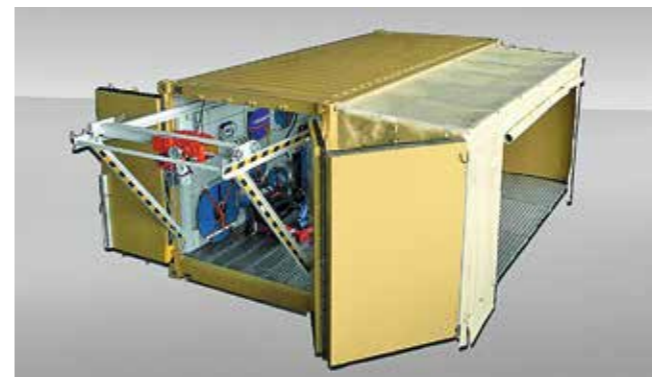

### **MULTIBOX-Spares**

Spare parts – specifically matched to your individual needs. All components are safely stowed for transport and use.

### **MULTIBOX-Wheel Assembly**

Available in various designs, this container and equipment can be used to repair the wheel assemblies of a wide variety of vehicles.

### **MULTIBOX-STTE**

A variety of designs for optimal storage of special tools and test equipment. This ensures safer transport and handling in operations.

### **Pick-Up Box**

The little sister of the MULTIBOX – highly mobile and adaptable to the DINGO/Unimog. When equipped for the specific task at hand, the possibilities are limitless.

## / MULTIBOX system solution options

### System availability included

Our system solutions focus on the availability of your weapon systems – highly specialized and experienced service engineers are at your side to ensure readiness for operation. Spare parts or tools for your specific requirements/needs are already included so that you can concentrate on your job. This way, we ensure efficiency and effectiveness – even in operations or on your training missions.

### Computer equipment and warehouse management program

Modern equipment and secure connections are essential to have a constant overview of spare parts inventories and storage locations. Both online and off! We offer our own tools for this purpose, or we work together with you to ensure the right interfaces in your warehouse systems.

#### IT Equipment

The IT system integrated into the MULTIBOX makes it possible to work both online and off. As soon as there is an online connection, the data for the warehouse management program can be transmitted along the supply chain.

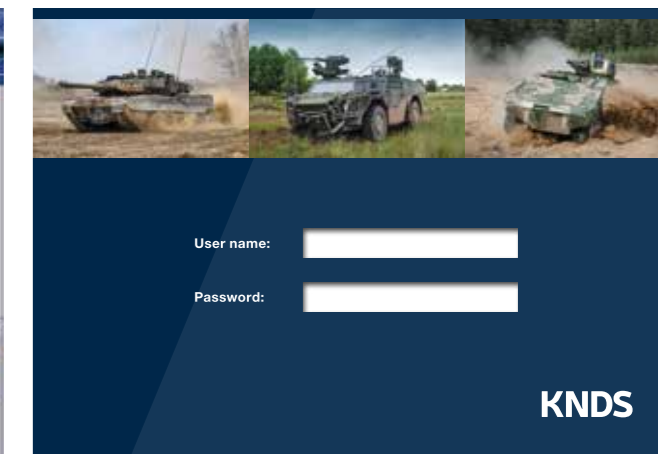

#### KNDS Warehouse Management

The KNDS warehouse management program can be used to query the stock level of articles located in the MULTIBOX at any time, thereby ensuring optimal availability.

#### KNDS Service Portal/Webshop

Provides an internet-based spare parts catalog for the smooth processing of order and delivery processes – accessible 24/7.
